

Digesters for Sale – an Entirely New Idea for Southeastern Connecticut!

The *Southeastern Connecticut Regional Resource Recovery Authority* is also offering the *Green Cone System*. This is not Compost Bin – it does not generate any compost!

Rather the *Green Cone System* is a *Digester* – it accepts all the material the backyard composter can't:

- Red Meat & Poultry
- Fish and Bones
- Cooked Food Scraps
- Dog & Cat Feces
- Dairy Products

The lower black “basket” is buried into the ground; the upper green “cone” is actually 2 dual cones, all working to create a *Digester*.

It's a new idea – and we are offering the *Green Cone System* at cost (\$85) – along with the backyard composters – also on Saturday, April 25 9 – 1.

Go online to Solarcone.net to obtain more information on the *Green Cone System*.
